America's Astronauts and Their Indestructible Spirit Fred Kelly, 1986

Shattered Dreams Colin Burgess, 2019-05-01 *Shattered Dreams* delves into the personal stories and recollections of several men and women who were in line to fly a specific or future space mission but lost that opportunity due to personal reasons, mission cancellations, or even tragedies. While some of the subjects are familiar names in spaceflight history, the accounts of others are told here for the first time. Colin Burgess features spaceflight candidates from the United States, Russia, Indonesia, Australia, and Great Britain. *Shattered Dreams* brings to new life such episodes and upheavals in spaceflight history as the saga of the three Apollo missions that were cancelled due to budgetary constraints and never flew; NASA astronaut Patricia Hilliard Robertson, who died of burn injuries after her airplane crashed before she had a chance to fly into space; and a female cosmonaut who might have become the first journalist to fly in space. Another NASA astronaut was preparing to fly an Apollo mission before he was diagnosed with a disqualifying illness. There is also the amazing story of the pilot who could have bailed out of his damaged aircraft but held off while heroically avoiding a populated area and later applied to NASA to fulfill his cherished dream of becoming an astronaut despite having lost both legs in the accident. These are the incredibly human stories of competitive realists fired with an unquenchable passion. Their accounts reveal in their own words--and those of others close to them--how their shared ambition would go awry through personal accidents, illness, the Challenger disaster, death, or other circumstances.

Fallen Astronauts Colin Burgess, Kate Doolan, Bert Vis, 2016-05-01 Near the end of the Apollo 15 mission, David Scott and fellow moonwalker James Irwin conducted a secret ceremony unsanctioned by NASA: they placed on the lunar soil a small tin figurine called *The Fallen Astronaut*, along with a plaque bearing a list of names. By telling the stories of those sixteen astronauts and cosmonauts who died in the quest to reach the moon between 1962 and 1972, this book enriches the saga of humankind's greatest scientific undertaking, Project Apollo, and conveys the human cost of the space race. Many people are aware of the first manned Apollo mission, in which Gus Grissom, Ed White, and Roger Chaffee lost their lives in a fire during a ground test, but few know of the other five fallen astronauts whose stories this book tells as well, including Ted Freeman and C.C. Williams, who died in the crashes of their T-38 jets; the "Gemini Twins," Charlie Bassett and Elliot See, killed when their jet slammed into the building where their Gemini capsule was undergoing final construction; and Ed

Givens, whose fatal car crash has until now been obscured by rumors. Supported by extensive interviews and archival material, the extraordinary lives and accomplishments of these and other fallen astronauts—including eight Russian cosmonauts who lost their lives during training—unfold here in intimate and compelling detail. Their stories return us to a stirring time in the history of our nation and remind us of the cost of fulfilling our dreams. This revised edition includes expanded and revised biographies and additional photographs.

NASA's Scientist-Astronauts Shayler David, Colin Burgess, 2007-09-19 This book provides unique access to the story of how scientists were accepted into the American Space Programme, and reveals how, after four difficult decades, the role of the heroic test pilot astronaut has been replaced by men and women who are science orientated space explorers.

Term Paper Resource Guide to Twentieth-Century United States History Ron Blazek, Teri Maggio, Robert Muccigrosso, 1999-05-30 Students will write more effective term papers with this guide to 500 term paper ideas—as well as a listing of appropriate print and nonprint sources— on twentieth-century U.S. history. This guide presents entries on 100 of the most important events and developments in twentieth-century U.S. history organized in chronological order. Each entry consists of a short description of the event, followed by five specific suggestions for term papers about the event, and a wide-ranging annotated bibliography of 15-35 books, articles, videos, and a web site appropriate for student research. In every case the emphasis is on recent and up-to-date material, as well as landmark works and primary sources. Every entry contains a video and concludes with a recommended web site, producing a multimedia approach designed to appeal to the current information-gathering habits and preferences of young people. From the Spanish-American War to the creation of NAFTA, the 100 events and developments cover political, social, economic, and cultural issues. The work has been designed to meet the needs of the U.S. history curriculum. Term paper topic ideas offer students thought-provoking suggestions that are challenging and develop critical thinking skills. The annotated bibliography is organized into reference sources, general sources, specialized sources, biographical sources, periodical articles, recommended videos and World Wide Web sites. All items are readily available in school, public, and academic library collections. This unique guide is valuable not only to students, but to teachers and librarians who guide students in research, and is an excellent purchasing guide for librarians who serve student needs.

John Glenn Andrew Chaikin, 2014-04-15 In February 1962, he became the first American to orbit the Earth. Since then John Herschel Glenn Jr. has stood in the popular imagination as a quintessentially American hero. In *John Glenn: America's Astronaut*, a special edition e-book featuring 45 stunning photographs as well as a video, Chaikin explores Glenn's path to greatness. *John Glenn* features new details on Glenn's selection as an astronaut in 1959, newly synchronized onboard film and audio of Glenn's harrowing reentry from orbit on his 1962 Mercury mission, rarely seen images of Glenn in orbit and from the John Glenn archives at Ohio State University, as well as new, touching reminiscences of Glenn's 1998 return to space

from his Space Shuttle crewmates. Glenn is the embodiment of the history of human spaceflight and the indefatigable American spirit, and John Glenn: America's Astronaut is his amazing story.

Gemini - Steps to the Moon Shayler David,2001-09-01 In *Gemini - Steps to the Moon*, David Shayler, the author, tells the story of the origin and development of the programme and the spacecraft from the perspective of the engineers, flight controllers and astronauts involved. It includes chapters on flight tests, Extra Vehicular Activity (EVA), rendezvous and docking, as well as information from NASA archives and personal interviews.

In the Shadow of the Moon Francis French,Colin Burgess,2007-01-01 Tells the story of the exciting and challenging years in space flight, with two superpowers engaged in a titanic struggle to land one of their own people on the moon. This book explores the inspirations, ambitions, personalities, and experiences of the select few whose driving ambition was to fly to the moon.

Into That Silent Sea Francis French,Colin Burgess,2009-09-01 A history of early space flight focuses on the careers of both American astronauts and Soviet cosmonauts and includes coverage of other persons who worked in support roles.

Calculated Risk George Leopold,2016-06-15 Unlike other American astronauts, Virgil I. Gus Grissom never had the chance to publish his memoirs. Killed along with his crew in a launch pad fire on January 27, 1967, Grissom also lost his chance to walk on the moon and return to describe his journey. Others went in his place. The stories of the moon walkers are familiar. Less appreciated are Grissom's contributions. The international prestige of winning the Moon Race cannot be understated, and Grissom played a pivotal and enduring role in securing that legacy for the United States. Indeed, Grissom was first and foremost a Cold Warrior, a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union into space and eventually to the moon. Drawing on extensive interviews with fellow astronauts, NASA engineers, family members, and friends of Gus Grissom, George Leopold delivers a comprehensive and corrective account of Grissom's life that places his career in the context of the Cold War and the history of human spaceflight. *Calculated Risk: The Supersonic Life and Times of Gus Grissom* adds significantly to our understanding of that tumultuous and ultimately triumphant period in American history.

Spacewalk Carl R. Green,2012-07-01 Gemini 4 pilot Ed White could see Hawaii, California, Texas, and Florida. Millions of Americans had seen these places before, but White had a unique view. He looked at them while walking in space. One hundred miles above Earth and moving freely outside the Gemini 4 spacecraft, White saw these states as tiny stepping stones. The first American spacewalk was a monumental achievement, and it helped push the space program toward its ultimate goal of landing men on the Moon. From the brave astronauts to the technology that made it possible, author Carl R. Green explores the astounding Gemini 4 mission.
